

Palmo

MORTISE

PRODUCT:

Mortise installation exit bar for panic exit locks.

APPLICATION:

The drive mechanism of the Palmo mortise lock for fire doors, when used together with the relative locks and accessories, is designed to comply with the standard EN1125 and offers excellent reliability, security and durability. The design of the devices has never compromised on style and aesthetics. This product features an attractive actuator bar design, while its construction, with no plastic components, expresses the sturdiness and durability of the product itself.

The version with a stainless steel finish is ideal for locations where the fire door must not appear to be a mere legal requisite.

Palmo combines tried and tested performance with easy installation, modular construction, versatility and superlative safety. In keeping with its attention to safety, ISEO has decided to add an ANTIGERM treatment to its products. The effect of this antibacterial treatment is permanent, and does not require any special maintenance. The continuous release of silver ions guarantees constant effectiveness throughout the working life of the product, even if the surface is scratched. This makes it particularly suitable for installation in public places and in any other areas where hygiene and healthcare are a basic necessity: hospitals, clinics and nursing homes, as well as crèches and pre-school structures.

RANGE:

Fire resistant versions with self-locking steel latchbolts.

ISEO®

TECHNICAL FEATURES

Can be combined with locks and anti-panic fire-resistant mortise counter-locks with square handle 9 mm., 72 mm centres and 30° square handle rotation.

Can be combined with locks and DINFIR3 series panic fire-resistant mortise counter-locks with 9 mm handle set, 72 mm centres and 30° handle set rotation.

Durability: 200,000 cycles.

Door mass: up to 200kg

Door dimensions:

- maximum width 1500 mm
- maximum height 3400 mm

Corrosion resistance:

240 hours in a saline environment.

Bar protrusion:

less than 100 mm

Operating temperature:

from -10°C to +60°C.

Colours available:

black, metal grey, PVD-stainless steel, ENDUR4NCE.

Anti-bacterial protection:

AntiGerm on the painted versions and ENDUR4NCE.
