

Combination Lock 78

Technology

- Shackle made from hardened steel
- 78KC: Master key opens more than 2 000 individual combinations (master key function by cylinder on the back of the lock)
- High protection against manipulation
- KTL-coating (black) for better corrosion protection

Operation and use

- To secure valuables/goods of lesser value or at a low risk of theft
- Handy operation without key, e.g. lockers, cupboards, etc. in schools, companies, etc.

Variants

- Size: 50 mm, 78KC/50 (Key Control)

Combination lock with safe locking mechanism
