

## Master Keying System & Software

Master Design Software, developed by RB, is an advanced, web based key system software for building sophisticated and highly secure master key systems.

**KEYLOCX patented cylinder by RB, the versatile high security cylinder guaranteeing longstanding protection, restricted key duplication and adaptability to various key systems (master keyed/keyed alike/keyed different).**

KEYLOCX, RB's new patented platform for advanced high security cylinders is based on a combination of active pins inserted into the key blank.

KEYLOCX cylinders are suitable for use in a broad range of applications requiring restricted duplication key systems; residential, industrial and commercial.

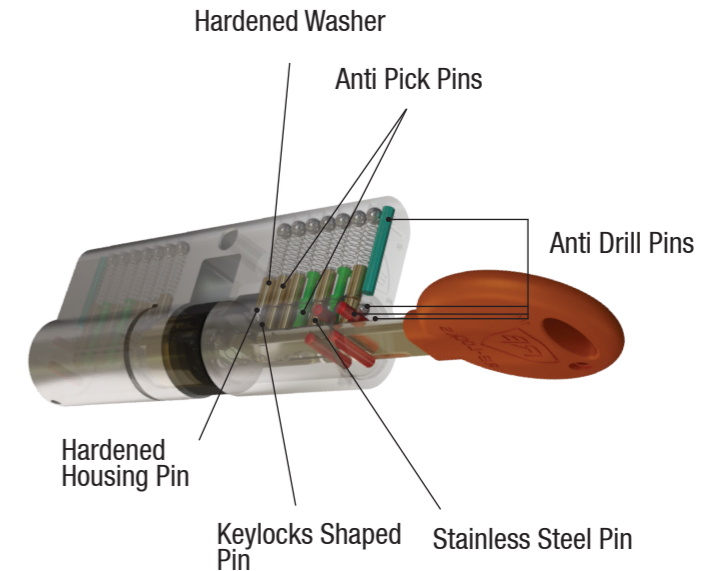

- The KEYLOCX technology is patented till 2030
- The KEYLOCX cylinder and lock platform are designed to retro-fit into existing and new door hardware made by different lock manufacturers, achieving a highly protected single-key system.
- The active pins of the KEYLOCX key are designed for maximum durability and provide an advanced range of combination possibilities.
- The tumblers and body pins of the cylinder are made of durable stainless steel, hardened steel and brass.
- The cylinder body and plugs include a number of anti-drilling, hardened pins for heightened tamper protection.
- A unique KEYLOCX duplication card is supplied with each cylinder, padlock or cam lock. Duplication of keys is strictly controlled by this card.

### KEYLOCX Cylinder – EN1303 Classification:

1 (1)	6 (4-6)	0 (-)	0 (0/1)	0 (-)	C (A/B/C/0)	5 (1-6)	2 (0-2)

### KEYLOCX – patented High Security Cylinder

- Durable and Reliable • Resistant to Unwanted Tampering

### Patented Mechanism Technology
