## CERTIFICATE OF APPROVAL

### No CF 5394

---

This is to certify that, in accordance with  
TS00 General Requirements for Certification of Fire Protection Products  
The undermentioned products of

**ANTIPANIC S.p.a.**

**Via Paolo Fabbri 1/A, 40013 Castle Maggiore (BO), Italy**  
**Tel: +39 051 808045**

Have been assessed against the requirements of the Technical Schedule(s)  
denoted below and are approved for use subject to the conditions  
appended hereto:

---

#### CERTIFIED PRODUCT

**Panic Exit Devices and Exit  
Pad Emergency Exit Devices  
and Associated Accessories**

#### TECHNICAL SCHEDULE

**TS26 The Contribution of Panic  
Exit Devices to the Fire  
Resistance of Door Assemblies**

**TS31 The Contribution of  
Emergency Exit Devices to the  
Fire Resistance of Door  
Assemblies**

**Signed and sealed for and on behalf of Warringtonfire Testing and Certification Limited**

**Paul Duggan**  
**Certification Manager**

Issued: 11<sup>th</sup> December 2015  
Reissued: 12<sup>th</sup> March 2021  
Valid to: 11<sup>th</sup> March 2026

## CERTIFICATE OF APPROVAL

### No CF 5394

---

#### Antipanic S.p.a. - Panic Exit & Emergency Exit Devices

1. This approval relates to the Antipanic series of panic and emergency exit device and associated accessories as detailed within this certificate. The devices are generally all surface fixed.
2. This certification is provided to the client for their own purposes and we cannot opine on whether it will be accepted by Building Control authorities or any other third parties for any purpose.
3. This approval relates to the use of the family of exit devices with the following door assemblies:-

**Previously proven unlatched, door assemblies consisting of timber faced and edged leaves with timber, cellulosic or mineral cores in timber or steel frames containing intumescent seals having a fire resistance up to 120 minutes (Codes ITT and ITM).**

**Previously proven unlatched, door assemblies consisting of non-metallic faced and edged leaves proprietary composite frames, of which the principal material is other than timber or metal, but may include other materials having a fire resistance up to 120 minutes (Codes ITC).**

**Previously proven unlatched door assemblies consisting of uninsulated or insulated predominantly steel leaves, hung in steel frames with or without intumescent seals having a fire resistance up to 240 minutes (Code IMM/MM)\*.**

\* See separate table of performance within Items 11, 12 and 13 for limitations on push pad, motorised, and micro-switched units

4. It is assumed that where panic hardware with motorised and/or micro-switch function are required the door manufacturer has suitable fire test evidence or certification for the required classification period with a suitable concealed or surface mounted cable loop, as required.
5. The exit devices are approved on the basis of:
  - i) Initial type testing to EN 1125 and EN 179 for mechanical properties
  - ii) Initial type testing to EN 1634-1 for the fire resistance performance of doorsets
  - iii) An appraisal against TS26 and TS 31
  - iv) Certification of quality management system
  - v) Inspection and surveillance of factory production control
  - vi) On-going audit testing in accordance with EN 1125: 2008 requirements and EN 179: 2008 requirements

---

## CERTIFICATE OF APPROVAL

### No CF 5394

---

#### Antipanic S.p.a. - Panic Exit & Emergency Exit Devices

6. It is a requirement of this report that the doorsets to which the panic hardware is fitted shall have been previously tested unlatched in the configuration required.
7. The purpose of the appraisal is only to consider the influence of fitting the proposed hardware items to a doorset, and not its ability to provide an essential latching action.
8. The hardware shall only be fitted to ITC doorsets which have previously been shown capable of accommodating the installation of surface mounted panic and escape hardware, without detriment to the doorset's performance.
9. This approval is applicable only to the specified exit devices and relevant accessories when used with door assemblies of proven fire resistance (as defined by EN 1634-1) which have previously been successfully tested unlatched in the configuration required, but shall be fitted with a CERTIFIRE approved door closer. Failure to install the device and accessories in the appropriate manner will invalidate this certificate of approval.
10. The approval relates to on-going production. Product and/or its immediate packaging is identified with the manufacturer's name, the product name or number, the CERTIFIRE name or name and mark, together with the CERTIFIRE certificate number and application where appropriate.

## CERTIFICATE OF APPROVAL No CF 5394

### Antipanic S.p.a. - Panic Exit & Emergency Exit Devices

11. The following table shows acceptable doorsets types and fire resistance periods for all units with the exception of push pad, motorised, and micro-switched units:

#### Antipanic S.p.a. - Panic Exit & Emergency Exit Devices

14. Doors are classified as the following types:

**Code ITT** - 20 minute to 120 minute doorsets containing intumescent seals and consisting of timber faced and edged leaves with timber, cellulosic or mineral cores, hung in timber-based frames.

**Code ITM** - 20 minute to 120 minute doorsets containing intumescent seals and consisting of timber faced and edged leaves with timber, cellulosic or mineral cores, hung in metal frames.

**Code ITC** - 20 minute to 120 minute doorsets containing intumescent seals and consisting of timber faced and edged leaves with timber, cellulosic or mineral cores, hung in proprietary composite frames, of which the principal material is other than timber or metal but which may include any other materials.

**Code MM** - 20 to 240 minute doorsets consisting of uninsulated or insulated predominantly steel leaves, hung in steel frames without intumescent seals.

**Code IMM** - 20 to 240 minute doorsets consisting of uninsulated or insulated predominantly steel leaves, hung in steel frames with intumescent seals.
